- Sprinkler Supervision
- SecureNet radio
- CCTV Camera Systems
- Temperature/Water or flood alarm monitoring
- ON Q & Cat-5 Cabling
- Home Theater Systems
- Card Access Systems
- REACH - Portable Panic/Holdup Systems

## JADE ALARM'S SECURENET RADIO BACKUP DOES IT... AGAIN!!

Over the years, our SecureNet Radio network has helped many of our customers in the prevention of a loss and given them *peace of mind* both at home and work. Driving this point home, recently, two intruders were apprehended when they cut the phone lines, destroyed the outside siren and then broke into the premise.

These masters of burglary thought they were home-

free, however, Jade Alarm had other plans in store for these intruders!

At the speed of light the SecureNet transmitter notified our Central Station Dispatchers who contacted the Police. Due to the quick response by both our Central Station Dispatchers and the Police, loss to the premise was negligible and the thieves were apprehended attempting to flee the scene when the Police Squad Cars arrived.

**CONGRATULATIONS TO ALL INVOLVED!!**

DIGITAL PHONE SERVICE MAY NOT BE AS FANTASTIC AS ADVERTISED!

Over the past several months, we have had problems when customers have called wondering why their alarm is not working properly. Upon arrival of our service tech, we have found the customer has switched to "Digital Phone Service". The problems with digital phone service are many and include:

- 1) Not properly wired—causing line seizure problems.
- 2) Not compatible with the alarm transmitter—causing fail to communicate .
- 3) In the event of a power outage, their small 'battery back-up' really appears to last a very, very short period of time. Leaving you at risk!

Jade Alarm recommends staying with AT&T as your phone carrier for these reasons!

### WARNING!!

**JADE ALARM PERSONNEL ARE UNIFORMED & CARRY PICTURE ID ANY CONCERNS? IMMEDIATELY CALL US!**
