- Home Theater Systems
- Card Access Systems
- REACH - Portable Panic/Holdup Systems

Over the years, our Company has been involved with several manufactures for testing of equipment. One of the types of devices we have been testing has been the ProLine series of motion detectors from Bosch' laboratories. We are pleased to be able to offer these high performance detectors for those customers who would wish to upgrade their level of intruder detection. Some of the features that make these units desirable

SMILE!!
YOU ARE ON
JADEVISION

Want to know more about our CCTV indoor or outdoor camera systems with the ability for the Central Station to 'look in' if there is an alarm? Just give us a call and we will be glad to help!!

are:

1. ***Fusion technology*** to help prevent false alarms due to random occurrences.
2. ***Anti-mask/spray detection.*** In the event someone attempts to defeat the sensor by masking it, the sensor will very quickly detect this and trigger its alarm output.

If interested in upgrading to this latest in technology, we have a rebate program in

DIGITAL PHONE
SERVICE
MAY NOT BE
AS FANTASTIC AS
ADVERTISED!

Over the past several months, we have had problems when customers have called wondering why their alarm is not working properly. Upon arrival of our service tech, we have found the customer has switched to "Digital Phone Service". The problems with digital phone service are many and include:

- 1) Not properly wired—causing line seizure problems.
- 2) Not compatible with the alarm transmitter—causing fail to communicate .
- 3) In the event of a power outage, their small 'battery back-up' really appears to last a very, very short period of time. **Leaving you at risk!**

Jade Alarm recommends staying with SBC / AT&T as your phone carrier for these reasons!
